Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

1. (currently amended) A wireless intelligent personal network server,

comprising:

a radio frequency (RF) receiver for receiving downstream data transmitted over a

first wireless communications channel;

a memory;

a central processing unit (CPU);

a set of embedded machine language instructions, said set of embedded machine

language instructions being executable by said CPU for processing said downstream data

to provide at least one electronic file in said memory; and

a first interface for allowing an external display device to selectively access said

at least one electronic file.

2. (currently amended) The wireless intelligent personal network server of claim

1, wherein said downstream data reflects changes made to at lease one source electronic

file, said at least one electronic file being an updated version of at least one existing

electronic file stored in said memory.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 80606 TELEPHONE (312) 913-0001

3. (currently amended) The wireless intelligent personal network server of claim

1, wherein said at least one electronic file is a new electronic file.

4. (currently amended) The wireless intelligent personal network server of claim

1, wherein said first interface allows said external display device read-only access to said

at least one electronic file.

5. (currently amended) The wireless intelligent personal network server of claim

1, wherein said first interface allows said external display device to change said at least

one electronic file.

6. (currently amended) The wireless intelligent personal network server of claim

1, wherein said external display device is a computer selected from the group consisting

of desktop personal computer, laptop personal computer, and personal digital assistant

(PDA).

7. (currently amended) The wireless intelligent personal network server of claim

6, wherein said external display device is a personal digital assistant (PDA).

8. (currently amended) The wireless intelligent personal network server of claim

1, wherein said first interface allows a first external display device to access said at least

one electronic file at a first time and allows a second external display device to access

said at least one electronic file at a second time.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606 TELEPHONE (312) 913-0001

9. (currently amended) The wireless intelligent personal network server of claim

1, further comprising:

a radio frequency (RF) transmitter for transmitting at least one signal over a

second wireless communications channel.

10. (currently amended) The wireless intelligent personal network server of

claim 9, wherein said RF transmitter transmits an acknowledgement signal over said

second wireless communications channel when said RF receiver receives said

downstream data.

11. (currently amended) The wireless intelligent personal network server of

claim 10, wherein said RF transmitter transmits upstream data over said second wireless

communications channel, said upstream data reflecting changes to said at least one

electronic file made by said external display device.

12. (currently amended) The wireless intelligent personal network server of

claim 1, further comprising:

a second interface for controlling a wireless telephone to transmit at least one

signal.

CHICAGO, ILLINOIS 60606

13. (currently amended) The wireless intelligent personal network server of

claim 12, wherein said second interface controls said wireless telephone to transmit an

acknowledgement signal when said RF receiver receives said downstream data.

14. (currently amended) The wireless intelligent personal network server of

claim 12, wherein said second interface controls said wireless telephone to transmit

upstream data, said upstream data reflecting changes to said at least one electronic file

made by said external display device.

15. (currently amended) The wireless intelligent personal network server of

claim 12, further comprising:

a battery for powering said wireless intelligent personal network server.

16. (currently amended) The wireless intelligent personal network server of

claim 15, further comprising:

first power contacts for electrically connecting to recharger contacts disposed on

said external display device; and

a first power management circuit for selectively connecting said battery to said

first power contacts.

17. (currently amended) The wireless intelligent personal network server of

claim 15, further comprising:

HULBERT & BERGHOFF LLF 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60608 TELEPHONE (312) 913-0001

second power contacts for electrically connecting to recharger contacts disposed on said wireless telephone; and

a second power management circuit for selectively connecting said battery to said second power contacts.

18. (currently amended) The wireless intelligent personal network server of claim 1, further comprising:

a bar-code input for connecting a bar-code reader.

19. (currently amended) The wireless intelligent personal network server of claim 1, further comprising:

a GPS input for connecting a global positioning system (GPS) receiver.

20. (currently amended) The wireless intelligent personal network server of claim 1, further comprising:

a keyboard input for connecting an external keyboard.

21. (currently amended) The wireless intelligent personal network server of claim 1, further comprising:

a card reader input for connecting a card reader.

22. (currently amended) A wireless data communication system, comprising:

a wireless intelligent personal network server, said wireless intelligent personal

network server including a memory and a radio frequency (RF) receiver, said RF receiver

being for receiving downstream data transmitted over a first wireless communications

channel, said wireless intelligent personal network server processing said downstream

data to provide at least one electronic file in said memory; and

a wireless telephone in communication with said wireless intelligent personal

network server, wherein said wireless intelligent personal network server causes said

wireless telephone to transmit an acknowledgment signal over a second wireless

communications channel when said wireless intelligent personal network server receives

said downstream data.

23. (currently amended) The wireless data communication system of claim 22,

wherein said wireless intelligent personal network server includes an interface for

allowing an external display device to access said at least one electronic file.

24. (original) The wireless data communication system of claim 23, wherein said

interface allows said external display device read-only access to said at least one

electronic file.

25. (original) The wireless data communication system of claim 23, wherein said

interface allows said external display device to change said at least one electronic file.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606

26. (original) The wireless data communication system of claim 23, wherein said

external display device is a computer selected from the group consisting of desktop

personal computer, laptop personal computer, personal digital assistant (PDA), and set-

top television controller box.

27. (original) The wireless data communication system of claim 26, wherein said

external display device is a personal digital assistant (PDA).

28. (original) The wireless data communication system of claim 23, wherein said

interface allows a first external display device to access said at least one electronic file at

a first time and allows a second external display device to access said at least one

electronic file at a second time.

29. (original) The wireless data communication system of claim 23, wherein said

wireless telephone transmits upstream data over said second wireless communications

channel, said upstream data reflecting changes to said at least one electronic file made by

said external display device.

30. (currently amended) The wireless data communication system of claim 22,

wherein said wireless intelligent personal network server includes a battery for powering

said wireless intelligent personal network server.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60608

31. (currently amended) The wireless data communication system of claim 30, wherein said wireless intelligent personal network server includes:

first power contacts electrically connected to recharger contacts disposed on said wireless telephone; and

a first power management circuit for selectively connecting said battery to said first power contacts.

32. (currently amended) The wireless data communication system of claim 30, wherein said wireless intelligent personal network server includes:

second power contacts electrically connected to recharger contacts disposed on said external display device; and

a second power management circuit for selectively connecting said battery to said first power contacts.

33. (currently amended) A wireless data display system, comprising:

a wireless intelligent personal network server, said wireless intelligent personal network server including a memory and a radio frequency (RF) receiver, said RF receiver being for receiving downstream data transmitted over a first wireless communications channel, said wireless intelligent personal network server processing said downstream data to provide at least one electronic file; and

a separate display device in communication with said wireless intelligent personal network server, said separate display device having at least one application that selectively accesses said at least one electronic file to display information to a user.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60608 TELEPHONE (312) 913-0001 34. (original) The wireless data display system of claim 33, wherein said at least

one application is able to change said at least one electronic file stored in said memory.

35. (previously presented) The wireless data display system of claim 33, wherein

said separate display device is a computer selected from the group consisting of desktop

personal computer, laptop personal computer, and personal digital assistant (PDA).

36. (previously presented) The wireless data display system of claim 35, wherein

said separate display device is a personal digital assistant (PDA).

37. (currently amended) The wireless data display system of claim 33, wherein

wireless intelligent personal network server includes a radio frequency (RF) transmitter

for transmitting at least one signal over a second wireless communications channel.

38. (original) The wireless data display system of claim 37, wherein said RF

transmitter transmits an acknowledgement signal over said second wireless

communications channel when said RF receiver receives said downstream data.

39. (original) The wireless data display system of claim 37, wherein said RF

transmitter transmits upstream data over said second wireless communications channel,

said upstream data reflecting changes to said at least one electronic file made by said

display device.

McDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 6606 TELEPHONE (312) 913-0001

40. (currently amended) The wireless data display system of claim 33, wherein

said wireless intelligent personal network server includes an interface for controlling a

wireless telephone to transmit at least one signal.

41. (original) The wireless data display system of claim 40, wherein said

interface controls said wireless telephone to transmit an acknowledgement signal when

said RF receiver receives said downstream data.

42. (previously presented) The wireless data display system of claim 40, wherein

said interface controls said wireless telephone to transmit upstream data, said upstream

data reflecting changes to said at least one electronic file made by said separate display

device.

43. (currently amended) The wireless data display system of claim 33, wherein

said wireless intelligent personal network server includes a battery for powering said

wireless intelligent personal server.

44. (currently amended) The wireless data display system of claim 43, wherein

said wireless intelligent personal network server includes:

first power contacts electrically connected to recharger contacts disposed on said

separate display device; and

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60806 TELEPHONE (312) 913-0001

a first power management circuit for selectively connecting said battery to said

first power contacts.

45. (currently amended) The wireless data display system of claim 43, wherein

said wireless intelligent personal network server includes:

second power contacts electrically connected to recharger contacts disposed on

said wireless telephone; and

a second power management circuit for selectively connecting said battery to said

second power contacts.

46. (currently amended) A method for updating a target electronic file to reflect

changes made to a source electronic file, said method comprising the steps of:

storing said target electronic file in a wireless intelligent personal network server;

said wireless intelligent personal network server receiving downstream data

transmitted over a first wireless communications channel, said downstream data

reflecting said changes made to said source electronic file;

said wireless intelligent personal network server automatically updating said

target electronic file with said downstream data to provide an updated electronic file:

bringing an external display device into communication with said wireless

intelligent personal network server; and

selectively accessing said updated electronic file with said display device.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606 TELEPHONE (312) 913-0001

47. (currently amended) The method of claim 46, further comprising the step of:

said wireless intelligent personal network server transmitting at least one signal

over a second wireless communications channel.

48. (original) The method of claim 47, wherein said at least one signal includes

an acknowledgement signal for acknowledging receipt of said downstream data.

49. (currently amended) The method of claim 46, further comprising the step of:

said wireless intelligent personal network server causing a wireless telephone to

transmit at least one signal over a second wireless communications channel.

50. (original) The method of claim 49, wherein said at least one signal includes

an acknowledgement signal for acknowledging receipt of said downstream data.

51. (currently amended) A method for creating, without user intervention, an

electronic file on a wireless intelligent personal network server, said method comprising

the steps of:

said wireless intelligent personal network server receiving downstream data

transmitted over a first wireless communications channel;

said wireless intelligent personal network server automatically creating said

electronic file from said downstream data;

bringing an external display device into communication with said wireless

intelligent personal network server; and

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606

selectively accessing said electronic file with said display device.

52. (currently amended) The method of claim 51, further comprising the step of:

said wireless intelligent personal network server transmitting at least one signal

over a second wireless communications channel.

53. (original) The method of claim 52, wherein said at least one signal includes

an acknowledgement signal for acknowledging receipt of said downstream data.

54. (currently amended) The method of claim 51, further comprising the step of:

said wireless intelligent personal network server causing a wireless telephone to

transmit at least one signal over a second wireless communications channel.

55. (original) The method of claim 54, wherein said at least one signal includes

an acknowledgement signal for acknowledging receipt of said downstream data.

56. (currently amended) A wireless intelligent personal network server,

comprising:

a radio frequency (RF) transceiver for receiving downstream data transmitted over

a first wireless communications channel;

a memory;

a central processing unit (CPU);

McDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 80608 TELEPHONE (312) 913-0001 a set of embedded machine language instructions, said set of embedded machine

language instructions being executable by said CPU for processing said downstream data

to provide at least one electronic file in said memory; and

a first interface for allowing an external display device to selectively access said

at least one electronic file.

57. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said downstream data reflects changes made to at least one source

electronic file, said at least one electronic file being an updated version of at least one

existing electronic file stored in said memory.

58. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said at least one electronic file is a new electronic file.

59. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said first interface allows said external display device access to said at

least one electronic file.

60. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said first interface allows said external display device to change said at

least one electronic file.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLF 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606

61. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said external display device is a computer selected from the group

consisting of desktop personal computer, laptop personal computer, and personal digital

assistant (PDA).

62. (currently amended) The wireless intelligent personal network server of

claim 61, wherein said external display device is a personal digital assistant (PDA).

63. (currently amended) The wireless intelligent personal network server of

claim 56, wherein said RF transceiver transmits at least one signal over a second wireless

communications channel.

64. (currently amended) The wireless intelligent personal network server of

claim 63, wherein said RF transceiver transmits an acknowledgement signal over said

second wireless communications channel when said RF transceiver receives said

downstream data.

65. (currently amended) The wireless intelligent personal network server of

claim 64, wherein said RF transceiver transmits upstream data over said second wireless

communications channel, said upstream data reflecting changes to said at least one

electronic file made by said external display device.

HULBERT & BERGHOFF LLF 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606 TELEPHONE (312) 913-0001

66. (currently amended) The wireless intelligent personal network server of claim 56, further comprising:

a bar-code input for connecting a bar-code reader.

67. (currently amended) The wireless intelligent personal network server of

claim 56, further comprising:

a GPS input for connecting a global positioning system (GPS) receiver.

68. (currently amended) The wireless intelligent personal network server of

claim 56, further comprising:

a keyboard input for connecting an external keyboard.

69. (currently amended) The wireless intelligent personal network server of

claim 56, further comprising:

a card reader input for connecting a card reader.

70. (currently amended) A wireless data display system, comprising:

a wireless intelligent personal network server, said wireless intelligent personal

network server including a memory and a radio frequency (RF) transceiver, said RF

transceiver being for receiving downstream data transmitted over a first wireless

communications channel, said wireless intelligent personal network server processing

said downstream data to provide at least one electronic file; and

McDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60608

a separate display device in communication with said wireless intelligent personal

network server, said separate display device having at least one application that

selectively accesses said at least one electronic file to display information to a user.

71. (previously presented) The wireless data display system of claim 70, wherein

said at least one application is able to change said at least one electronic file stored in said

memory.

72. (previously presented) The wireless data display system of claim 70, wherein

said separate display device is a computer selected from the group consisting of desktop

personal computer, laptop personal computer, and personal digital assistant (PDA).

73. (previously presented) The wireless data display system of claim 70, wherein

said separate display device is a personal digital assistant (PDA).

74. (previously presented) The wireless data display system of claim 70, wherein

said RF transceiver transmits an acknowledgement signal over a second wireless

communications channel when said RF transceiver receives said downstream data.

75. (previously presented) The wireless data display system of claim 74, wherein

said RF transceiver transmits upstream data over said second wireless communications

channel, said upstream data reflecting changes to said at least one electronic file made by

said separate display device.

MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60608

76. (currently amended) The wireless data display system of claim 70, wherein

said wireless intelligent personal network server includes a battery for powering said

separate display device.

77. (currently amended) The wireless intelligent personal network server of

claim 56, further comprising a second interface for controlling a wireless telephone to

transmit at least one signal.

78. (currently amended) The wireless data display system of claim 70, wherein

said wireless intelligent personal network server includes an interface for controlling a

wireless telephone to transmit at least one signal.

79. (currently amended) The wireless intelligent personal network server of

claim 8, wherein said first and second external display devices are different kinds of

display device.

80. (previously presented) The wireless data communication system of claim 28,

wherein said first and second external display devices are different kinds of display

device.

McDONNELL BOEHNEN HULBERT & BERGHOFF LLP 300 SOUTH WACKER DRIVE CHICAGO, ILLINOIS 60606 TELEPHONE (312) 913-0001
